

Let's come together

Facebook post advertising first Pathway to Survival webinar late July 2022.

Lets come together. All of us fighting for our children, our planet, our mana whenua. All of us who know there are fairer ways of sharing the wealth, better ways of defining real wealth, more democratic ways of making decisions... And who want these changes NOW! We are running out of time!

The Green Party leadership issue shows how hard it is to make change within a political party without a strong, clear, collective message from the public about what we want.

Time to come together in a citizen's coalition. A movement of movements. So many of us have been working on those needed changes for so long. Let's get out of our silos, engage with one another and co-create a joint platform of demands.

A group of us in Extinction Rebellion are holding fortnightly webinars to get this ball rolling ...

- Thurs 4 Aug - Jason Hickel and John Minto on ["Using less and sharing it more fairly"](#)
- Thurs 18 Aug - Catherine Murupaenga Ikenn on why tiriti justice is integral to climate justice
- Thurs 1 Sept - Mike Joy on how we must care for the land, nature and food security to survive

And more to come. Go to www.pathwaytosurvival.nz for a list of the Big Changes we need and the likely folk we'll be inviting to come and talk to them!

Come join in and let's build this mahi together!
